

THE GLOBAL PARTNERSHIP: 2017-18 PRIORITIES FOR EFFECTIVE DEVELOPMENT CO-OPERATION TO REACH THE SDGS

The Global Partnership for Effective Development Co-operation (Global Partnership) is an inclusive multi-stakeholder platform aiming to maximise the effectiveness of all forms of co-operation for development for the shared benefit of people and planet. The Global Partnership promotes mutual accountability for more effective development co-operation as catalyst to achieve the 2030 Agenda for Sustainable Development. Created in 2011 at the Fourth High-Level Forum on Aid Effectiveness in Busan, Republic of Korea, the Global Partnership brings together development actors from governments, multilateral/bilateral institutions, civil society, local governments, regional organisations, trade unions, the business sector, philanthropy, and academia in a vibrant community, working to increase the effectiveness of their partnerships for development at country level to reach development commitments and the SDGs by 2030.

The Global Partnership sustains political momentum for more effective development co-operation by taking action in line with the shared principles of **country ownership, a focus on results, inclusive partnerships, and transparency and accountability to one another.**

Based on evidence and emerging issues, the Global Partnership's focus in 2017-2018 lies on:

Enhancing support to effective development co-operation at the country level, supporting countries in mainstreaming effectiveness principles and ensuring country-led evidence informs policy debate at all levels.

Unlocking the potential of effectiveness and monitoring progress for 2030, identifying ways to boost effectiveness, updating the monitoring framework and conducting the 2018 Monitoring Round.

Sharing knowledge and scaling up evidence-based, innovative development solutions, and serving as a 'go to' platform for knowledge exchange on effective development co-operation.

Scaling up private sector engagement mobilised through development co-operation to attract inclusive business investments that generate shared value for business and development outcomes, with inclusive evidence and dialogue, and principles and guidelines for the effectiveness of private sector engagement.

Learning from different kinds of partnerships, enhancing exchanges between North-South, South-South and Triangular co-operation partners, drawing together options to scale up impact and learn from each other.

Sustaining political momentum for effective development co-operation by strengthening high-level political engagement, advocacy, public communication and strategic use of data and evidence.
