for Effective Development  
Co-operation

## Indicator Fact Sheet

### Indicator 9b - Use of country public financial management and procurement systems

This fact sheet includes details on the methodology underpinning Indicator 1 during the 2015-2016 Round of [Global Partnership Monitoring](#), including means of measurement, method of calculation and data source.

For questions, please contact the UNDP-OECD Joint Support Team at [info@effectivecooperation.org](mailto:info@effectivecooperation.org)

Effective institutions: developing country systems are used  
**Indicator 9b. Use of country public financial management and procurement systems**

<b>Relevant Busan commitment</b>	
Paris Declaration (§21, 26) and Accra (§15) commitments, as reaffirmed in Busan. Busan commitment to “use country systems as the default approach for development co-operation in support of activities managed by the public sector” (§19a)	
<b>Indicator construction</b>	<b>Measure</b>
<p>Numerator: Development co-operation flows using country systems (average of a, b ,c and d)</p> <p>Denominator: Total development co-operation flows for the government sector</p> <p>where:            a = Development co-operation funding disbursed for the government sector using national budget execution procedures            b = Development co-operation funding disbursed for the government sector using national financial reporting procedures            c = Development co-operation funding disbursed for the government sector using national auditing procedures            d = Development co-operation funding disbursed for the government sector using national procurement systems</p>	<p>Note that this indicator combines Paris Declaration indicators 5a (use of country PFM systems) and 5b (use of country procurement systems) to offer a single composite indicator</p> <p>% of development co-operation disbursements for the government sector using the developing country’s PFM and procurement systems (average across use of four components a-d below)</p>
<b>Data source</b>	<b>Aggregation</b>
Country-level data (self-reporting by providers of development co-operation)	Developing country, co-operation provider, global: total of numerators divided by total of denominators
<b>Baseline</b>	<b>Proposed target for 2015</b>
2010 (78 countries): 49%	<p>Country target depends on score for indicator 9a above (quality of PFM systems):</p> <ul style="list-style-type: none"> <li>• Reduce the gap by two thirds – a two-thirds reduction in % of development co-operation funding not using country PFM and procurement systems for countries with a score of <math>\geq 5</math> on indicator 9a</li> <li>• Reduce the gap by one third – a one-third reduction in % of development co-operation not using country PFM and procurement systems for countries with a score between 3.5 and 4.5 on indicator 9a</li> </ul> <p>Rationale: based on the logic underpinning the Paris Declaration target (though procurement is now one of the four components of country systems included in the indicator, rather than being subject to a separate target)</p>
