50+ programme evaluations consulted

Evaluation units from 8 institutions and research centres contributed

Gather evidence on the impact of effectiveness principles application on development outcomes

The evidence gathered will contribute to demonstrate that effectiveness delivers impact across SDGs. It aims at rebuilding the case for effectiveness in programme design and implementation.
INCLUSIVE PROJECT DESIGN LEAD TO JOB CREATION AND OTHER BENEFITS

CSO CONSULTATION ON SOCIAL AND ENVIRONMENTAL ISSUES

DIRECT RESULTS

Evidence from the ILO’s Employment Intensive Investment Programme in Timor-Leste and Somalia

- 300 KMS OF RURAL ROADS rehabilitated and maintained in Timor-Leste
- 600,000 WORK DAYS created in Timor-Leste
- 130,000 WORK DAYS created in Somalia

INDIRECT RESULTS

- IMPROVED ACCESS TO MARKETS IN RURAL AREAS
- POVERTY REDUCTION
- FOCUS ON THE MOST VULNERABLE (Leave no one behind)
INCREASED PUBLIC SPENDING AND ACCESS TO EDUCATION THROUGH ALIGNMENT AND OWNERSHIP

**USE OF BUDGET SUPPORT**

- Extra resources to the budget
- More money better policies in education
- Improved infrastructure and quality of education
- Increased access to primary and secondary education (girls and disadvantaged)

**SUSTAINABLE DEVELOPMENT GOALS**

- Increased incomes
- Inclusive economic growth
- Skilled population increased employment opportunities
- More women employed and running businesses

*Evidence from evaluation of Budget Support in the education sector (Independent Commission for Aid Impact, 2012)*
TRANSPARENCY, PREDICTABILITY AND FOCUS ON RESULTS LEAD TO REDUCED INEQUALITIES

Evidence from social protection programmes in Ethiopia and Malawi

FRAGMENTED AND SPORADIC SAFETY NET PROGRAMME

- Cash transfers with occasional delays
- Uncertainty / perceived risk
- Decision to sell assets
- High levels of debt at unsustainable rates
- Unsustainable borrowing
- Displacement

Poor resistance to economic and natural disasters leading to increased poverty rates, malnutrition ...

PREDICTABLE AND RESULTS FOCUSED SOCIAL PROTECTION

- Study of targeted populations behaviour with focus on results
- Integration of a predictability component in the programme design
- Stable resources for timely cash transfers
- Transparency on the rationale and entitlement for cash transfer

- Reduction of income uncertainty
- Better expenditure planning
- Increased livelihoods

Increased resilience

Reduced adverse risk effect at the micro-level = long-term investment decisions affecting productivity, growth, responsible production ...
We need to build the case for Effectiveness as a driver of impact.

• How can we do this?

Our positive experiences of effectiveness that delivers impact are valuable.

• We need to be prepared to revisit approaches that have worked

• And we need to develop and build on these approaches so that they are relevant for and contribute to new forms of development cooperation and new types of finance.
