

# Seychelles

Seychelles is a high-income country and a Small Island Development State (SIDS) with a GNI of 14,170 USD per capita (2017) and a population of 96,000 inhabitants (2017). In the 2018 Monitoring Round, Seychelles reported on 16 million USD in development co-operation flows.

## Major development partners in the 2018 Monitoring Round (by reported disbursements in 2017)

## 1. National development planning and results orientation

### Overall quality of national results framework

High-quality, inclusive and results-oriented development strategies are critical for countries' ownership over their development and the implementation of the 2030 Agenda and the Sustainable Development Goals (SDGs). The quality of national development planning in Seychelles is **low (49%)**.

### Extent of use of country-owned results frameworks by development partners

Development partner alignment to country-led development priorities is at the heart of country ownership. Global Partnership monitoring assesses whether interventions: draw objectives from national development strategies; draw indicators from country results frameworks; use government data and statistics for monitoring; and involve government in evaluations. The first three elements provide the official data to report on SDG indicator 17.15.1. In Seychelles, development partners align to country priorities to a **high extent (84%)** - SDG indicator 17.15.1.

YES

... aligns to SDGs

YES

Regular progress reports are available

NO

## 2. Multi-stakeholder engagement

Recognising that successful development efforts require the inclusive and equitable participation of all actors, the 2030 Agenda calls for collective action by the whole of society. Global Partnership monitoring examines the engagement of civil society and the private sector from both the perspective of the government and representatives of these stakeholder groups.

### Quality of public-private dialogue

Government representatives perceive the quality of public-private dialogue as **consolidating**, large private sector firms as **consolidating** and trade unions as **emerging**.

Effective Consolidating Emerging Weak Not assessed

### Enabling environment for civil society organisations...

... was reported as **moderate** by government representatives, **moderate** by civil society organisations and **moderate** by development partners.

### 3. Quality and use of public financial management systems

#### Strengthening public financial management systems

Strong public financial management (PFM) systems are an essential element of good governance and vital to achieving development goals. Seychelles experienced **significant progress** in the quality of its PFM systems.

#### Development partners' use of country systems

Development partners' use of these systems to deliver co-operation both lowers transaction costs but also helps to accelerate their strengthening. In Seychelles, use of country PFM systems was reported to be **28%** in 2018.

#### Overall use of country systems

#### Systems to track and make public allocations for gender equality and women's empowerment

Adequate and effective financing is essential to achieve gender equality and to empower all women and girls. Seychelles has **some elements** of a system in place to track and make public allocations for gender equality and women's empowerment, **approaching the requirements of SDG indicator 5.c.1.**

### 4. Predictability and forward planning

High-quality and timely information on development co-operation helps governments in planning and managing resources for results and can guide development partners in coordinating their support with other providers, as to avoid fragmentation and duplication of efforts.

Annual predictability of development co-operation is **high**, with **94%** of co-operation disbursed as scheduled. Medium-term predictability is **medium**, with **81%** of co-operation available in forward looking expenditure plans for the next three years.

#### Predictability of development co-operation

### 5. Mutual accountability mechanisms

Mutual accountability underpins the efforts of development actors to meet joint commitments, improve how they work together and increase their development effectiveness. Mutual accountability mechanisms are made up of multiple, reinforcing components that can help enhance transparency and accountability at country level. Global Partnership monitoring defines and assesses mutual accountability against five components. Seychelles has **two out of five** components in place.
